EDUCATION

- Vilnius University** Vilnius, Lithuania
Bachelor of Computing - Software Engineering 2021 – present
- University of Warwick** Coventry, England
Master of Engineering (MEng) - Computer Science 2020 – 2020
- Mažeikiai Gabija gymnasium** Mažeikiai, Lithuania
Grade (year 12): 9.83/10 2016 – 2020
National maturity examinations where I received the maximum possible amount of points: Physics, Information technology, Mathematics, English

SKILLS SUMMARY

- Languages:** C#, JavaScript/TypeScript, C++, HTML/CSS/Sass
- Frameworks:** .NET, NodeJS, React, Gatsby, MonoGame
- Tools:** Unity, Git, MySQL, npm, VS/VSCode, YouTrack
- Platforms:** Windows, Linux, Web, Arduino, Raspberry Pi, Google Cloud
- Soft Skills:** Task and time management, Documentation, Leadership, Ability to quickly gather, understand and apply new information

EXPERIENCE

- Bankera** Remote
Front End developer (Full-time until Sep 2021, Part-time since (because of University)) Dec 2020 – present
 - Landing pages:** Maintenance, refactoring and addition of functionality to several finance related landing pages using Gatsby
 - Blog:** Maintenance of a blog (Gatsby) with Strapi CMS
 - CI/CD:** Deployment pipelines, Docker, GitLab
 - Mailer:** Handling several mailing cases/scenarios for a NodeJS mailer service
- Bankera** Remote
Front End developer (Part-time) Sep 2020 – Dec 2020
 - Landing pages:** Maintenance, refactoring and addition of functionality to several finance related landing pages using CRA
 - Form functionality:** Field validation, error messaging, receiving and sending/posting data
 - Blog:** Updating blog entries, adding requested features such as pagination, searching, improving SEO

NOTABLE PERSONAL PROJECTS

- Bx2 Blog (Web, Blog system based on markdown files, portfolio):** A blog where I post about software, hardware, technologies and personal insights, ideas and experiments. Also serving as my portfolio.
2021
Website, Repository
Tech: TypeScript, Webpack, Sass, MDX, Jest
- Programming Problems Testing System (Web, Source file compilation, Searchable and sortable database of programming problems, Authentication):** A system/website which automates testing of programming challenges/problems (similar to codeforces or codewars).
2019 – 2020
Demo, Repository, Analysis paper (in Lithuanian)
Tech: ASP.NET Core, MySQL, C/C++, Bootstrap
- LED Matrix Generator (Desktop, Serialization, Suited for hardware):** Helps to create LED matrix graphics for arduino/engineering projects.
2018
Repository
Tech: .NET, WPF, JSON
- Orbur (Desktop, Reflections):** Control a robot by creating Scratch-like sequences of commands and improve your logic and programming skills.
2018
Repository
Tech: C#, Unity
- Powerless Miner (Web, Android, Path finding):** A video game made for the Ludum Dare 39 game jam (the theme was "Running out of Power").
2017
Website, Repository, Game jam entry
Tech: C#, Unity
